SUMMARY

Passionate about technology. What inspires me is knowing that I can help create systems that can be used by thousands of people around the world.

Currently working as a Front-end developer, developing web and mobile applications. Using as a tool, technologies such as: HTML, CSS, JavaScript, TypeScript, ReactJS and its ecosystem. In addition to other technologies that help in the development and integration of applications: Git, Gitlab, VSCode, Postman, Figma, Styled-Components, Next.js.

Subjects of my interest:

- Clean Code
- UX & UI
- Responsive Web Design
- SEO
- SPA
- Clean Code
- Agile/Scrum
- MVP

Always looking for new knowledge and challenges. Feel free to get in touch, it will be a pleasure.

REVELANT EXPERIENCE

FRONT-END DEVELOPER

B2BIT COMPANY | OCT 2021 - PRESENT

Development of web and mobile applications with a focus on creating MVPs for different types of customers.

- Development of web systems using React JS and Typescript
- Building responsive and indexable landing pages with Next.js
- Building mobile apps for Android and iOS with React Native
- Experience with Agile/Scrum environment

FRONT-END INTERN

FRETEC ENTREGAS | FEB 2021 - SEP 2021

Development and maintenance of a platform for deliveries by application, connecting companies and self-employed drivers.

- Front-end development with ReactJS, Redux and Bootstrap.
- Mobile development with React Native.
- Coding of web system screens, following the layout designed in FIGMA.
- Implementation of a mechanism in the app to collect location data from couriers in the background, in order to show their current location in the system.
- Agile methodology (SCRUM), participation in daily meetings to create new solutions and propose improvements.
